

Glenellen Solar Farm

Construction Update No. 1

September 30, 2024

Works completed or in progress

- Pre-construction work has been completed
- Construction has official begun
- The site compound has been established
- The site is being prepared for the coming fire season:
 - water storage tanks allocated throughout the project
 - internal roads for fire access
 - managing flammable vegetation at a safe level.
- There are currently approximately 25 people working on-site with approximately half from a local contractor

Upcoming works on site

- Landscape screening planting will begin onsite
- Fencing works will commence
- Deliveries of construction components will start early October
